MICROFILMED
The Beautiful Jim Key Collection (1885 – [1897-1907] – 1933) was donated to TSLA in 2005 by a relative (Annie Mott Whitman) of Dr. William Key, the self-trained, African-American veterinarian (and former slave) who partnered with promoter A. R. Rogers to showcase the extraordinary talents of the horse, Jim Key, during the late nineteenth and early twentieth century. The collection is comprised of photographs, tickets, letters, programs, broadsides, flyers, newspaper clippings, and other ephemera related to Jim Key’s travels around the country. This collection is significant for its documentation of the humane movement for animals in the United States in the late nineteenth and early twentieth century, especially as it relates to humane education for children. The most important item at TSLA related to this collection is Mim Eichler Rivas’ 2005 book, Beautiful Jim Key: The Lost History of a Horse and a Man who Changed the World, which details the life of Jim Key and those who promoted him.

The collection is approximately 1.5 cubic feet and includes two scrapbooks and one box of loose items. These items were most likely originally a part of the scrapbooks, but at some point fell out of their original locations. The scrapbooks were originally created by Dr. William Key and A. R. Rogers and were later passed on to relatives of Dr. Key. The condition of the scrapbooks was only fair when received by TSLA, as many of the items were torn, damaged, or had fallen out of their original positions in the scrapbooks.

All materials in the collection have been individually listed in the container list for this finding aid. Conservation work has been completed on both scrapbooks: volume #1 was kept in its original order, but reformatted on acid-free materials. The second scrapbook, located in box #2, has not been reformatted, but it was interleafed with acid-free paper. Most of the images have been scanned. Volume #1 can be safely handled, but the scrapbook located in box #2 is too fragile for frequent handling or photocopying. The materials in the Hollinger box are safe to handle. Except for conservation issues with the scrapbook in box #2, there are no restrictions on this collection.
BIOGRAPHICAL SKETCHES

Dr. William Key (1833 - 1909) owner and trainer of Jim Key

Dr. William Key was born a slave in Winchester, Tennessee. His master, John W. Key, was a planter in Shelbyville, Tennessee. William was tutored by his master and early on showed signs of high intelligence and remarkable abilities. Key was later trained as an apprentice in veterinary medicine. During the Civil War he fought for the Confederate Army and was at one point imprisoned as a spy. Key was married four times; his first three wives died, but his fourth wife, Maggie, outlived him. At age 57, Key started teaching Jim Key, and was 64 when he started exhibiting the horse and showcasing his talents. Key had no children, but treated Jim as if he were his own child. He was widely known for his gentle treatment of Jim, and his strongly held belief that horses were best trained through kindness and patience.

A. R. Rogers (1864 - 1946) promoter for Jim Key

A native of Cincinnati, Ohio, Rogers first encountered Jim Key at the Tennessee Centennial Exposition in 1897. He established a business relationship with Dr. William Key when he realized that together, they could successfully promote the unusual talents and skills of Jim Key as well as humane education and kindness to animals. Rogers worked with prominent animal advocacy organizations and representatives, including the MSPCA’s George T. Angell, during his tenure as Jim Key’s business manager. Rogers was involved in promoting and marketing other large-scale entertainment events throughout the country as well.

Beautiful Jim Key (1889 - 1912) the horse who was trained by kindness and showed signs of high intelligence and special abilities

Jim Key was born near Shelbyville, Tennessee. At birth, he was “spindly, shank-legged,” and named after a bow-legged drunkard who lived nearby. His sire was Tennessee Volunteer, a Hamiltonian horse or standard bred, typically used for trotting (harness racing). Jim Key’s dam was Lauretta, a pure-bred Arabian mare. According to legend, she was stolen from a Persian sheik. Even though her value was originally $50,000, William Key acquired her for $40 – a low sum of money, as she was broken down and unhealthy after years of unkind treatment as a circus horse. Jim Key eventually grew into a beautiful and intelligent horse, and by exhibiting his special gifts, helped to change the landscape of humane education in the United States. Key performed throughout the country from 1897 to 1906.

Monk (? - 1909?) Jim Key’s canine protector and friend.

Monk was a mixed-breed dog who was Jim Key’s constant companion and guard.
SCOPE & CONTENT

The Beautiful Jim Key Collection (1885 – [1897-1907] – 1933) showcases the accomplishments of Dr. William Key, the African-American veterinarian who partnered with promoter A. R. Rogers to promote the special talents of the horse, Jim Key. The collection is comprised of two scrapbooks, which include photographs, tickets, letters, programs, broadsides, flyers, newspaper clippings, and other ephemera related to Jim Key’s extensive travels around the country. Scrapbook #1 has been reformatted and encapsulated by the TSLA preservation lab, and can therefore be handled by the public. Scrapbook #2, however, is extremely fragile, and should only be handled when absolutely necessary; most of the pages have been scanned and are available for viewing as tiff files. This scrapbook has been interleafed and placed in an acid-free box, but many of the items are unstable, torn, and falling out. The items from the scrapbooks that fell out of their original location have been placed in acid-free folders and put into a separate box, labeled as box #1 in the collection.

This collection is significant for a number of reasons, only one of which is that it documents the emerging humane movement for animals in the United States. Jim Key’s travels with Dr. William Key and his promoter A. R. Rogers were especially important in that they reached children, and taught a new generation the importance of kindness towards animals. What is remarkable is the fact that Jim Key’s constant companion, Dr. William Key, was an African-American from the Jim Crow south who was able to impress thousands of Americans, both southern and northern, with his unusual gift for working with horses. His methods involved patience and kindness rather than force; he was ahead of his time in embracing restraint and gentleness in his management of equine training.

Because of the small size of this collection, and its documentation of an important component of the humane movement, the collection was inventoried on an item-level basis. Some of the especially significant materials in the collection include a letter written and signed by George Angell, the founder of one of the first humane societies in the United States, the MSPCA (Massachusetts Society for the Prevention of Cruelty to Animals). Rogers communicated with Angell on a number of occasions, one of which was to redeem himself in the eyes of the MSPCA, which had previously relieved him of his board position (vice-president) at the American Humane Education Society, much to Rogers’ disappointment. Additionally, some of the photographs in the scrapbook are exceptional, and show Jim Key and Dr. Key performing, or in other cases, groups of individuals assembling in front of a Jim Key show tent. Finally, lists of citizens who attended Jim Key events are included in the first scrapbook, and point to the fact that Rogers felt it necessary to document and prove the talents of Jim Key.

Rogers discovered Dr. Key and his talented horse at the 1897 Tennessee Centennial Exposition. They established a long-lasting business partnership by which Rogers handled promotional matters and bookings, and Dr. Key trained and cared for Jim Key. Their relationship and life story is carefully documented in Mim Eichler Rivas’ book, “Beautiful Jim Key: The Lost History of a Horse and a Man Who Changed the World.” Rivas consulted the Beautiful Jim Key Collection as she conducted her research.
Key performed for nine years around the country to large crowds at expositions, world’s fairs, schools, and other venues. He demonstrated his ability to read, write, spell, tell time, do simple mathematics, sort mail, and more. Famous Americans, including President McKinley, Booker T. Washington, and President Roosevelt’s flamboyant daughter, Alice, all personally witnessed Jim Key’s remarkable skills. Scientists searched in vain for evidence of fraud, but no one was ever able to show that Dr. Key was unfairly helping his horse complete the tasks he was performing. Instead, they found Jim Key to be charming, intelligent, and highly skilled.

Rogers and Dr. Key embraced the ethos of the humane movement and were able to get thousands of children to sign the Jim Key Pledge, “I promise always to be kind to animals.” Various “Bands of Mercy” were established throughout the United States, which promoted kindness to animals. The Bands of Mercy came under the umbrella of the American Humane Education Society, which was overseen by George Angell and the MSPCA. Rogers and Key were eventually able to establish alliances with humane societies throughout the country, although Rogers had a falling out with one national group in his later years. Rogers’ devotion to the humane cause was sometimes questioned, as he was fundamentally an events promoter who also touted shows unrelated to humane work such as the “Southern Life and Cotton Exhibition,” which displayed a reproduction of a southern plantation with “Negroes gathering cotton in the field” as well as the “Sub-marine Tank Exhibition,” which offered a “trip” to the bottom of the sea, where divers were working to raise sunken vessels.

In addition to revealing the extraordinary life of an ex-slave who traveled around the country with his gifted horse, this collection offers a unique blend of Tennessee history and turn-of-the-century popular culture. The underlying theme of kindness to animals was a cause that had recently emerged in American society not long after the Civil War, with the founding of the ASPCA in 1866 by Henry Bergh in New York City, and creation of the MSPCA in 1868 by Angell in Boston. Horses were the focus of much of the early advocacy efforts, as thousands of them were ill-treated as they served as the backbone of the nation’s transportation industry until the development of the automobile. The humane movement is in many cases poorly documented, so this collection will help preserve the history of the movement.
